Join Our Team!

A MULTI-SPECIALTY PRACTICE WITH AN OUTSTANDING REPUTATION FOR PATIENT CARE!

- Our private practice has a provider team comprised of: 8 physicians, 1 NP and 2 PA-Cs
- All of our physicians are board certified and our mid-level providers maintain the highest national certifications.
- Many of our providers have training in sub-specialties and we enjoy being able to offer on-site services to patients.

OUR SERVICES & LOCATION

- We offer many diagnostic services and technologies in-house, such as imaging and laboratory services.
- Our office has had a fully integrated EHR, Practice Management & Laboratory Information System since 2007.
- We are located adjacent to Pullman Regional Hospital, saving travel time and making patient rounds more convenient!

SALARY & BENEFITS

- Competitive employment package, including signing bonus and guaranteed first year salary
- Paid moving expenses
- Two weeks vacation/two weeks CME and $2,000 CME allotments for first year
- Partnership potential
- Eligible for 401-K /Profit Sharing Plan after one year of employment
- Paid malpractice insurance
- Flexible work schedule

MENTOR, PRECEPT & TEACH FUTURE GENERATIONS OF HEALTHCARE PROVIDERS

- Working with many academic institutions, we teach and mentor students interested in pursuing careers in healthcare.
- All of our physicians are certified members of The University of Washington School of Medicine’s faculty.
- Palouse Medical has been a UW clerkship site for 3rd year medical students interested in Internal Medicine since 2011.
- In 2014 we became a WRITE site, offering a 22 week long externship for 3rd year medical students.

Welcome to the Palouse!
One of the best kept secrets of the Pacific Northwest

Nestled among these beautiful rolling hills are the vibrant and thriving communities that we call home! The Palouse region stretches across southeastern Washington, north central Idaho, and extends down to the upper corner of Oregon. Here in our corner of paradise, breathtaking landscapes highlight each season throughout the year, while plant and animal life abound. With two large university campuses nearby, education, academic excellence and active learning are emphasized at every age. Residents and area guests can always depend on a wide variety of campus, cultural, athletic and community events to enjoy. When it comes to our social scene, entertainment and recreational activities, we can honestly say that there is something available for every interest. Come experience the unique energy that makes life in the Palouse feel “more urban than rural” and provides us with the very best of both these worlds.

Introducing Palouse Medical
Located in Pullman, Washington, our clinic provides care within a four county radius of our front doors. As a multi-specialty clinic, Palouse Medical is dedicated to providing every patient with the highest quality healthcare available. We offer comprehensive primary and specialty care services that span across the fields of internal and family medicine.

A Little About Our History...
We enjoy a unique “one-on-one” patient/provider connection that can only be experienced when practicing Primary Care in rural communities. As our patient’s Health Partner, we truly enjoy creating lasting relationships with patients and are committed to help them achieve their health and wellness goals.

Palouse Medical emerged from the combined vision of four separate, locally-owned medical practices. Their desire was to provide comprehensive health care services that would better serve their patient's growing needs. Having earned years of respect and trust from patients and the community, these medical offices merged in 1998 to create the multi-specialty clinic we know today. Palouse Medical enjoys providing care for the whole family, no matter how young or old!

Pullman ReadyCare was established by Palouse Medical in 2005. The goal was to create a walk-in-clinic for acute illness and minor injuries. ReadyCare provides problem-specific services to patients in a way that promotes and preserves continuity of care. We work hard to educate and appropriately triage patients so that our walk-in care is not used as a substitute for primary care. Our ReadyCare clinic is conveniently located inside Palouse Medical, open 7 days a week and available to all patients in the community!

We Never Lose Sight of the Reason We Practice Medicine!
